

Little Lights 31 January 2021

Hello Parents,

It is always said that it's better to get the difficult jobs done first, the ones you don't want to do before tackling the ones you don't mind doing. I think my worst job is probably, taking the bins out, as I always forget until late at night, when it's cold and dark or doing my tax return which is left until the last minute. When will I learn, and do what I know I will have to do in the end? Well in our video about Jonah, he refused to do what God had asked. It took him to be swallowed by a big fish and then belched back out onto the beach before he would agree to God's request.

Craft megaphone

Children love sending messages and all you need for this is some colour pens, paper cups, and string.

(Obviously never leave your children alone with the string as risk of strangulation)

Does a cup and string phone work?

A simple paper cup phone works by **transmitting sound vibrations along a tightly-pulled string.**

The bottom of each cup serves as a combination "microphone" and "speaker," picking up sound vibrations on one end and reproducing the sound at the other. The trick is the tightly pulled string.

Have a good week

With love Catherine, Little lights and the Ark
